Professional Summary

I am a seasoned software developer with extensive experience in developing and optimizing cloud-based applications. With a strong background in front-end development and customer service, I have honed my skills in creating responsive and efficient user interfaces using React, JavaScript, and CSS. My experience spans across various roles, from mentoring junior developers to leading customer service teams, which has equipped me with a unique blend of technical expertise and leadership capabilities. I am passionate about driving innovation and enhancing operational efficiency through collaborative teamwork and agile methodologies.

Employment History

Sr. Developer I, Launch by NTT Data

November 2023 - January 2025

In my role as a Senior Developer I, I played a pivotal role in the development of cloud-based applications, collaborating with a team of developers, designers, and QA engineers. I was instrumental in optimizing existing codebases, significantly improving application performance. Additionally, I mentored junior developers, fostering a collaborative environment that enhanced team productivity and innovation.

Developer II, Launch by NTT Data

November 2021 - November 2023

As a Developer II, I contributed to the development of a critical client-facing application and collaborated with cross-functional teams to design and implement scalable solutions. I was actively involved in migrating legacy systems to cloud-based infrastructures, driving technical innovation and operational efficiency.

Developer I, Launch by NTT Data

November 2020 - November 2021

During my tenure as a Developer I, I contributed to the successful delivery of multiple software projects by designing and implementing robust solutions tailored to client needs. I worked closely with cross-functional teams to integrate new technologies, ensuring seamless project execution.

Front End Web Developer, Preferred Hotels and Resorts

April 2018 - March 2020

I was responsible for creating and maintaining responsive templates for a proprietary booking engine. My role involved implementing web analytics and performing end-to-end testing to ensure a seamless user experience.

Relevant Skills

I possess expert-level skills in UI development, particularly in creating user interfaces using React, JavaScript, and CSS. My proficiency extends to cloud services, with advanced skills in Azure Cloud Services. I am highly skilled in JavaScript, including its use with frameworks like React and Node.js, and have advanced experience with Node.js technologies such as Express and Nest.js. Additionally, I have significant experience with Azure AD B2C for authentication. My background in customer service has also equipped me with excellent communication and problem-solving skills.

Projects

Vanilla VC

I developed a commercial web application using React, Node.js, MySQL, Express, Azure Web Services, and Puppeteer among others, focusing on creating a seamless and responsive user experience.

Carnival Cruise Corporation

I was involved in developing and implementing custom PDF generation using JavaScript and CSS, enhancing the functionality and user experience of the application.

I am eager to bring my technical expertise and leadership skills to a forward-thinking organization where I can contribute to innovative projects and drive business success.
